Financial Accounting as a Second Language John Wiley & Sons
This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).
Principles of Financial Accounting Textbook + Cd (Revised) + Working Papers Volume 1 + Eduspace Tata McGraw-Hill Education
This text is intended for a first course in Intermediate Financial Accounting. It presumes that students have already completed one or two Introductory Financial Accounting courses. The book reflects current International Financial Reporting Standards (IFRS), such as IFRS 15 - Revenue from Contracts With Customers. It focuses on more difficult intermediate accounting topics that

match prerequisite requirements for students advancing to a second level Intermediate Financial Accounting course. Advanced topics that are covered in Advanced Financial Accounting courses, such as consolidations and foreign exchange, are not included here. The text is written with an approachable style that focuses on key concepts that will be relevant to students' future careers as accountants. The book provides a review of Introductory Accounting concepts and covers all topics essential to a first level Intermediate Accounting course: the conceptual framework and current landscape of financial reporting; statements of financial position, comprehensive income, cash flows and shareholders' equity; cash and receivables; revenue; inventory; property plant and equipment; intangible assets; and intercorporate investments. Additional supplements are available through Lyryx Learning, including online formative assessment, editorial services, and support for students and instructors.

Financial Accounting for Undergraduates John Wiley & Sons
In the second Canadian edition of Accounting, we have continued with the tradition of focusing on the changing needs of accounting students and their instructors by utilizing feedback from student reviews, an Editorial Advisory Board, and external reviewers. Accounting faculty from all over the country contributed to our book development process in a direct and creative way. Accounting 2nd Canadian Edition takes a learn-by-doing approach to Accounting supported by Example Exercises, Mid-Chapter Illustrative Problems, and plentiful and comprehensive end-of-chapter exercises and problems. The unique Guided Principles System lays out what is to be covered in the Chapter and is an

important visual that helps students see the big picture. This integrated learning system helps guide students through the chapter content, leading to better homework outcomes, and accounting mastery. Students love the Real-World Chapter Openers and the Morning Java Financial Statements which provide a consistent reference point for users who want to see a full set of financial statements. An added critical thinking component and one-third more exercises and problems are key elements of this revision.

Intermediate Financial Accounting John Wiley & Sons

The 2008 financial crisis highlighted the need for responsible corporate governance within financial institutions. The key to ensuring that adequate standards are maintained lies with effective accounting and auditing standards. Accounting for Investments: Equities, Futures and Options offers a comprehensive overview of these key financial instruments and their treatment in the accounting sector, with special reference to the regulatory requirements. The book uses the US GAAP requirements as the standard model and the IFRS variants of the same are also given. Accounting for Investments starts from the basics of each financial product and: defines the product analyses the structure of the product evaluates its advantages and disadvantages describes the different events in the trade cycle elaborates on the accounting entries related to these events. The author also explains how the entries are reflected in the general ledger accounts, thus providing a macro level picture for the reader to understand the impact of such accounting. Lucidly written and informative, Accounting for Investments is a comprehensive guide for any professional dealing with these complex products. It also provides an accessible text for technology experts who develop software and support systems for the finance industry.
