is the first comprehensive
assessment of the Hindu

Kush Himalaya (HKH) region. It comprises important scientific research on the social, economic, and environmental pillars of sustainable mountain development and will serve as a basis for evidence-based decision-making to safeguard the environment and advance people's well-being. The compiled content is based on the collective knowledge of over 300 leading researchers, experts and policymakers, brought together by the Hindu Kush Himalayan

Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated Mountain Development (ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports, under the guidance of the HIMAP Steering Committee: Eklabya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatiwada (Nepal), Linxiu Zhang (China), Surendra Pratap

Singh (India), Tandong Yao (China) and David Molden (ICIMOD and Chair of the HIMAP SC). This First HKH Assessment Report consists of 16 chapters, which comprehensively assess the current state of knowledge of the HKH region, increase the understanding of various drivers of change and their impacts, address critical data gaps and develop a set of evidence-based and actionable policy solutions and recommendations. These are linked to nine

mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals. This book is a must-read for policy makers, academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports. *Towards New Policy Responses* CRC Press

This open access volume makes an important contribution to the ongoing research on hope theory by combining insights from both its long history and its increasing multi-disciplinarity. In the first part, it recognizes the importance of the centuries-old reflection on hope by offering historical perspectives and tracing it back to ancient Greek

philosophy. At the same time, it provides novel perspectives on often-overlooked historical theories and developments and challenges established views. The second part of the volume documents the state of the art of current research in hope across eight disciplines, which are philosophy, theology, psychology, economy, sociology, health studies, ecology, and development studies. Taken together, this volume provides an integrated view on hope

as a multi-faced phenomenon. It contributes to the further understanding of hope as an essential human capacity, with the possibility of transforming our human societies. Voting Rules and Political Behavior Cambridge University Press Traditionally, development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations. However, historically,

eclectic ideas and approaches often clash with existing long-established notions of progress and modes of realizing social and economic change. Managing Development in a Globalized World: Concepts, Processes, Institutions explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries. It underscores development as a continuous process

that must be supported by sound policies and efficient management, supplying a wider understanding of the field. The authors argue that the application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society. They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal/external actors

and a host of stakeholders. An exploration of key sectors in development provides clear comprehension of problems and solutions. A careful synthesis of theoretical/conceptual and empirical literature, the book assesses real-world situations and provides insight into the operational dynamics of development policies, programs, and institutions. It focuses on goals, values, and dynamics of development management that are undergoing rapid changes

and continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter-regional and inter-institutional synergies. It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society.

This open access book examines how childhood social disadvantage influences young-adult demographic decision-making and later-life economic and well-being outcomes. This book in particular focuses on testing whether the consequences of childhood social disadvantage for adult outcomes differ across societies, and whether these differences are shaped by the “context of opportunities” that societies offer to diminish the adverse impact of

economic and social deprivation. The book integrates a longitudinal approach and provides new insights in how the experience of childhood disadvantage (e.g. low parental socio-economic status, family disruption) influences demographic decisions in adulthood (e.g. the timing of family-events such as cohabitation, marriage or parenthood; the risk of divorce or having a child outside a partner relationship; the exposure to later-life loneliness, poor health, and

economic adversity). Moreover, using a cross-national comparative perspective it investigates whether the relationships of interest differ across nations, and tests the “context of opportunities” hypothesis arguing that the links between childhood disadvantage and adult outcomes are weakened in societal contexts offering good opportunities for people to escape situations of deprivation. To do so, the book analyzes national contexts based on economic prosperity,

family values and norms, and welfare-state arrangements.

How the World Changed

Social Media is the first

book in Why We Post, a

book series that

investigates the findings

of anthropologists who

each spent 15 months

living in communities

across the world. This

book offers a comparative

analysis summarising the

results of the research

and explores the impact

of social media on politics

and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet?

Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way

to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

This report analyses all aspects of cultural diversity, which has emerged as a key concern

of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and

non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a

coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

This report is the ninth in the world migration report series which is designed as a substantive contribution to increasing the understanding of current and strategic migration issues throughout the world. It presents key data and

information on migration as well as thematic chapters on highly topical migration issues. It is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues. The two parts are intended to provide both overview information that helps to explain migration patterns and processes globally and regionally, as

well as insights and recommendations on major issues that policymakers are - or soon - will be grappling with. From the Laboratory to the Classroom World Bank Publications
Be Prepared. Be VERY Prepared. Years after a nuclear apocalypse, a new society has risen from the ashes...and their bible is an old Ranger Scout manual. A young Ranger Scout named Kit has endured the harsh survivalist upbringing needed to conquer the irradiated Colorado

Badlands. But after discovering a terrible secret once lost to history, Kit must risk everything on a dangerous quest to uncover the truth behind the Ranger Scouts' doctrine. From multiple Ringo Award-nominated writer David Pepose (Spencer & Locke, Going to the Chapel, The O.Z.) and artist Luca Casalanguida (James Bond, Lost Soldiers) comes a post-apocalyptic coming-of-age tale that proves when all you know is a lie, a Scout's Honor is the only way to move

How can we design more sustainable industrial and urban systems that reduce environmental impacts while supporting a high quality of life for everyone? What progress has been made towards reducing resource use and waste, and what are the prospects for more resilient, material-efficient economies? What are the environmental and social impacts of global supply chains and how can they

be measured and improved? Such questions are at the heart of the emerging discipline of industrial ecology, covered in *Taking Stock of Industrial Ecology*. Leading authors, researchers and practitioners review how far industrial ecology has developed and current issues and concerns, with illustrations of what the industrial ecology paradigm has achieved in public policy, corporate strategy and industrial practice. It provides an introduction for students

coming to industrial ecology and for professionals who wish to understand what industrial ecology can offer, a reference for researchers and practitioners and a source of case studies for teachers.

"Its range is far broader than the majority of methods texts, being concerned with both human and physical geography... Given the

seriousness with which Key Methods in Geography approaches all aspects of research, it will continue to find wide favour among undergraduate geographers." - Times Higher Education Textbook Guide "All geographers, whatever their interest, need to do research. This book will help them get started in the best possible way, with thoughtful advice on everything from project design, through choice of methods, to data analysis and presentation. The

editors have assembled an impressive array of authors, all experts in their chosen field." - Tim Burt, University of Durham "Excellent book. Valuable teaching aid. Well written and covers a wide range of methods thoroughly." - Sue Rodway-Dyer, Exeter University "This is an excellent book and deals with a number of topics (which I teach) outside of the tutorial module where it is a recommended text for geographers. A very useful textbook throughout a 3 year

Geography programme." - Ian Harris, Bangor University Key Methods in Geography is an introduction to the principal methodological issues involved in the collection, analysis and presentation of geographical information. It is unique in the reference literature for providing an overview of qualitative and quantitative methods for human and physical geography. An accessible primer, it will be used by students as a reference throughout their degree,

on all issues from research design to presentation. This second edition has been fully revised and updated and includes new chapters on internet mediated research, diaries as a research method, making observations and measurements in the field, and the analysis of natural systems. Organized into four sections: Getting Started in Geographical Research; Generating and Working with Data in Human Geography; Generating and Working with Data in

Physical Geography; Representing and Interpreting Geographical Data; each chapter comprises: A short definition A summary of the principal arguments A substantive 5,000-word discussion Use of real-life examples Annotated notes for further reading. The teaching of research methods is integral to all geography courses: Key Methods in Geography, 2nd Edition explains all of the key methods with which geography undergraduates must be conversant.

Warlike and Peaceful Societies

UCL Press
Geopolitics and Development examines the historical emergence of development as a form of governmentality, from the end of empire to the Cold War and the War on Terror. It illustrates the various ways in which the meanings and relations of development as a discourse, an apparatus and an aspiration, have been geopolitically imagined and enframed. The book traces some of the multiple historical associations between

development and diplomacy and seeks to underline the centrality of questions of territory, security, statehood and sovereignty to the pursuit of development, along with its enrolment in various (b)ordering practices. In making a case for greater attention to the evolving nexus between geopolitics and development and with particular reference to Africa, the book explores the historical and contemporary geopolitics of foreign aid, the interconnections between

development and counterinsurgency, the role of the state and social movements in (re)imagining development, the rise of (re)emerging donors like China, India and Brazil, and the growing significance of South-South flows of investment, trade and development cooperation. Drawing on post-colonial and postdevelopment approaches and on some of the author's own original empirical research, this is an essential, critical and

interdisciplinary analysis of the complex and dynamic political geographies of global development. Primarily intended for scholars and post-graduate students in development studies, human geography, African studies and international relations, this book provides an engaging, invaluable and up-to-date resource for making sense of the complex entanglement between geopolitics and development, past and present.
Geopolitics and

Development Cambridge University Press
 Are humans violent or peaceful by nature? We are both. In this ambitious and wide-ranging book, Agner Fog presents a ground-breaking new argument that explains the existence of differently organised societies using evolutionary theory. It combines natural sciences and social sciences in a way that is rarely seen. According to a concept called regality theory, people show a preference for authoritarianism and

strong leadership in times of war or collective danger, but desire egalitarian political systems in times of peace and safety. These individual impulses shape the way societies develop and organise themselves, and in this book Agner argues that there is an evolutionary mechanism behind this flexible psychology. Incorporating a wide range of ideas including evolutionary theory, game theory, and ecological theory, Agner analyses the conditions that make us either

strident or docile. He tests this theory on data from contemporary and ancient societies, and provides a detailed explanation of the applications of regality theory to issues of war and peace, the rise and fall of empires, the mass media, economic instability, ecological crisis, and much more. **Warlike and Peaceful Societies: The Interaction of Genes and Culture** draws on many different fields of both the social sciences and the natural sciences. It will be of interest to academics and

students in these fields, including anthropology, political science, history, conflict and peace research, social psychology, and more, as well as the natural sciences, including human biology, human evolution, and ecology.

**Managing
Development in a
Globalized World**

Routledge
Are humans at their core seekers of their own pleasure or cooperative members of society? Paradoxically, they are both. Pleasure-seeking

can take place only within the context of what works within a defined community, and central to any community are the evolved codes and principles guiding appropriate behavior, or morality. The complex interaction of morality and self-interest is at the heart of Geoffrey M. Hodgson's approach to evolutionary economics, which is designed to bring about a better understanding of human behavior. In **From Pleasure Machines to Moral Communities**,

Hodgson casts a critical eye on neoclassical individualism, its foundations and flaws, and turns to recent insights from research on the evolutionary bases of human behavior. He focuses his attention on the evolution of morality, its meaning, why it came about, and how it influences human attitudes and behavior. This more nuanced understanding sets the stage for a fascinating investigation of its implications on a range of pressing issues drawn

from diverse environments, including the business world and crucial policy realms like health care and ecology. This book provides a valuable complement to Hodgson's earlier work with Thorbjørn Knudsen on evolutionary economics in Darwin's Conjecture, extending the evolutionary outlook to include moral and policy-related issues.

This open access book explores cultural

competence in the higher education sector from multi-disciplinary and inter-disciplinary perspectives. It addresses cultural competence in terms of leadership and the role of the higher education sector in cultural competence policy and practice. Drawing on lessons learned, current research and emerging evidence, the book examines various innovative approaches and strategies that incorporate Indigenous knowledge and practices into the

development and implementation of cultural competence, and considers the most effective approaches for supporting cultural competence in the higher education sector. This book will appeal to researchers, scholars, policy-makers, practitioners and general readers interested in cultural competence policy and practice.
